The meaning of the kabalistic axiom: ‘A stone becomes a plant; a plant a beast; a beast a man, etc.,’ was mentioned in another place in relation to the spiritual and physical evolution of man on this earth. We will now add a few words more to make the idea clearer.” — 1:388

What is the primitive shape of the future man? A grain, a corpuscle . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “What is the primitive shape of the future man? A grain, a corpuscle, say some physiologists; a molecule, an ovum of the ovum, say others. If it could be analyzed — by the spectroscope or otherwise — of what ought we to expect to find it composed? Analogically, we should say, of a nucleus or inorganic matter, deposited from the circulation at the germinating point, and united with a deposit of organic matter. In other words, this infinitesimal nucleus of the future man is composed of the same elements as a stone — of the same elements as the earth, which the man is destined to inhabit. Moses is cited by the kabalists as authority for the remark, that it required earth and water to make a living being, and thus it may be said that man first appears as a stone.” — 1:388-9

At the end of three or four weeks the ovum has assumed . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “At the end of three or four weeks the ovum has assumed a plant-like appearance, one extremity having become spheroidal and the other tapering, like a carrot. Upon dissection it is found to be composed, like an onion, of very delicate laminæ or coats, enclosing a liquid. The laminæ approach each other at the lower end, and the embryo hangs from the root of the umbilicus almost like a fruit from the bough. The stone has now become changed, by metempsychosis, into a plant. Then the embryonic creature begins to shoot out, from the inside outward, its limbs, and develops its features.” — 1:389

The eyes are visible as two black dots . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “The eyes are visible as two black dots; the ears, nose, and mouth form depressions, like the points of a pineapple, before they begin to project. The embryo develops into an animal-like fœtus — the shape of a tadpole — and like an amphibious reptile lives in water, and develops from it. Its monad has not yet become either human or immortal, for the kabalists tell us that that only comes at the ‘fourth hour.’ One by one the fœtus assumes the characteristics of the human being, the first flutter of the immortal breath passes through his being; he moves; nature opens the way for him; ushers him into the world; and the divine essence settles in the infant frame, which it will inhabit until the moment of physical death, when man becomes a spirit.” — 1:389

The mysterious process of a nine-months’ formation . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “This mysterious process of a nine-months formation the kabablists call the completion of the ‘individual cycle of evolution.’ As the fœtus develops from the *liquor amnii* in the womb, so the earths germinate from the universal ether, or astral fluid, in the womb of the universe.” — 1:389

vegetable, animal, and human forms. From centre to circumference, from the imperceptible vesicle to the uttermost conceivable bounds of the cosmos, these glorious thinkers, the kabalists, trace cycle merging into cycle, containing and contained in an endless series. The embryo evolving in its pre-natal sphere, the individual in his family, the family in the state, the state in mankind, the earth in our system, that system in its central universe, the universe in the cosmos, and the cosmos in the First Cause . . . “*The Garden of Eden as a locality is no myth . . .*”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “. . . the garden of Eden as a locality is no myth at all; it belongs to those landmarks of history which occasionally disclose to the student that the *Bible* is not all

mere allegory. ‘Eden, or the Hebrew גֶּן־עֵדֶן GAN-EDEN, meaning the park or the garden of Eden, is an archaic name of the country watered by the Euphrates and its many branches, from Asia and Armenia to the Erythraian Sea.’ ” — 1:575

(A. Wilder says that Gan-duniyas is a name of Babylonia.)

SEE: H. Clarke & C. S. Wake, *Serpent and Śiva Worship*, ed. A. Wilder, 1877: “. . . the region of Duni, at the confluence of the Tigris and Euphrates, called in the Assyrian tablets Kar-duniyas or Gan-duniyas. This latter name is the same as *GaN-EDeN*, the garden of God; and, indeed, Sir Henry Rawlinson has pointed out the agreement of the Babylonian region of Kar-duniyas with the Eden of the Bible.” — p. ix (“Introduction” by Wilder)

In the Chaldean “Book of Numbers,” the location is . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “In the Chaldean *Book of Numbers*, its location is designated in numerals, and in the cipher Rosicrucian manuscript, left by Count St. Germain, it is fully described. In the Assyrian *Tablets*, it is rendered *gan-dunyas*. ‘Behold,’ say the אֱלֹהִים *Eloim* of Genesis [3:22], ‘the man is become as one of us.’ The *Eloim* may be accepted in one sense for *gods* or powers, and taken in another one for the *Aleim*, or priests; the hierophants initiated into the good and the evil of this world; for there was a college of priests called the *Aleim*, while the head of their caste, or the chief of the hierophants, was known as *Java Aleim*.” — 1:575

Instead of becoming a neophyte . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “Instead of becoming a neophyte, and gradually obtaining his esoteric knowledge through a regular initiation, an *Adam*, or man, uses his intuitional faculties, and, prompted by the Serpent — *Woman* and matter — tastes of the Tree of Knowledge — the esoteric or secret doctrine — unlawfully. The priests of Hercules, or Mel-Karth, the ‘Lord’ of the Eden, all wore ‘coats of skin.’ The text says: ‘And *Java Aleim*, made for Adam and his wife כִּתְנוּת עוֹר, ‘CHITONUTH OUR.’ The first Hebrew word, *chitun*, is the Greek χιτών, *chiton*. It became a Slavonic word by adoption from the *Bible*, and means a *coat*, an upper garment.” — 1:575-6

“Though containing the same substratum of esoteric truth . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “Though containing the same substratum of esoteric truth as every early cosmogony, the Hebrew Scripture wears on its face the marks of its double origin. Its *Genesis* is purely a reminiscence of the Babylonian captivity. The names of places, men, and even objects, can be traced from the original text to the Chaldeans and the Akkadians, the progenitors and Aryan instructors of the former.” — 1:576

“It is strongly contested that the Akkad tribes . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “It is strongly contested that the Akkad tribes of Chaldea, Babylonia, and Assyria were in any way cognate with the Brahmans, of Hindustan; but there are more proofs in favor of this opinion than otherwise. The Shemite, or Assyrian, ought, perchance, to have been called the Turanian, and the Mongolians have been denominated Scyths. But if the Akkadians ever existed otherwise than in the imagination of some philologists and ethnologists, they certainly would never have been a Turanian tribe, as some Assyriologists have striven to make us believe.” — 1:576

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “They were simply emigrants on their way to Asia Minor from India, the cradle of humanity, and their sacerdotal adepts tarried to civilize and initiate a barbarian

people. Halevy proved the fallacy of the Turanian mania in regard to the Akkadian people, whose very name has been changed a dozen times already; and other scientists have proved that the Babylonian civilization was neither born nor developed in that country. It was imported from India, and the importers were Brahmanical Hindus.” — 1:576

By great rarefaction the free path of the molecules is made so long that . . . the properties which constitute gaseity are reduced to a minimum, and the matter then becomes exalted to an ultra-gaseous state. But the same condition of things will be produced if by any means we can take a portion of gas, and by some extraneous force infuse order into the apparently disorderly jostling of the molecules in every direction, by coercing them into a methodical rectilinear movement. . . . according to the extent to which this onward movement has replaced the irregular motions which constitute the essence of the gaseous condition, to that extent do I consider that the molecules have assumed the condition of radiant matter.” — pp. 275-6 (*Chemical News*, v. 41)

“The great lost continent might have . . . been . . . south of Asia . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “The great lost continent might have, perhaps, been situated south of Asia, extending from India to Tasmania? {It is a strange coincidence that when first discovered, America was found to bear among some native tribes the name of *Atlanta*}.” — 1:591 & fn.

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “If the hypothesis now so much doubted, and positively denied by some learned authors who regard it as a joke of Plato’s, is ever verified, then, perhaps, will the scientists believe that the description of the god-inhabited continent was not altogether fable. And they may then perceive that Plato’s guarded hints and the fact of his attributing the narrative to Solon and the Egyptian priests, were but a prudent way of imparting the fact to the world and by cleverly combining truth and fiction, to disconnect himself from a story which the obligations imposed at initiation forbade him to divulge.” — 1:591

“To continue the tradition . . . the class of hierophants was divided . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “To continue the tradition, we have to add that the class of hierophants was divided into two distinct categories: those who were instructed by the ‘Sons of God,’ of the island, and who were initiated in the divine doctrine of pure revelation, and others who inhabited the lost Atlantis — if such must be its name — and who, being of another race, were born with a sight which embraced all hidden things, and was independent of both distance and material obstacle. In short, they were the *fourth race* of men mentioned in the *Popol-Vuh*, whose sight was unlimited, and who knew all things at once.” — 1:592-3

On the one side the world had its Enochs, Moseses, Gautama-Buddhas, its numerous 'Saviours,' and great hierophants; on

the other hand, its ‘*natural* magicians’ who, through lack of the restraining power of proper spiritual enlightenment . . . perverted their gifts to evil purposes.” — 1:593

In the “*Histoire des Vierges . . .*”

SEE: LOUIS Jacolliot, *Histoire des Vierges: Les Peuples et les Continents Disparus*, 1874 [what follows are passages quoted from *Isis Unveiled*, originally translated from the French text].

“One of the most ancient legends of India . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘One of the most ancient legends of India, preserved in the temples by oral and written tradition, relates that several hundred thousand years ago there existed in the Pacific Ocean, an immense continent which was destroyed by geological upheaval, and the fragments of which must be sought in Madagascar, Ceylon, Sumatra, Java, Borneo, and the principal isles of Polynesia.’ ” — 1:594 fn. [*Histoire des Vierges*, p. 13]

“The high plateau of Hindustan and Asia . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘The high plateaux of Hindustan and Asia, according to this hypothesis, would only have been represented in those distant epochs by great islands contiguous to the central continent. . . . According to the Brahmans, this country had attained a high civilization, and the peninsula of Hindustan, enlarged by the displacement of the waters, at the time of the grand cataclysm, has but continued the chain of the primitive traditions born in this place. These traditions give the name of *Rutas* to the peoples which inhabited this immense equinoctial continent, and from their speech was derived the *Sanscrit*.’ ” — 1:594 fn. [*Histoire des Vierges*, pp. 13-14]

“And the Indo-Hellenic tradition . . . relates the existence of a continent . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘The Indo-Hellenic tradition, preserved by the most intelligent population which emigrated from the plains of India, equally relates the existence of a continent and a people to which it gives the name of Atlantis and Atlantides, and which it locates in the Atlantic in the northern portion of the Tropics.’ ” — 1:594 fn. [*Histoire des Vierges*, p. 14]

— 222-3 —

“Apart from this fact, the supposition of an ancient continent . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘Apart from the fact that the supposition of an ancient continent in those latitudes, the vestiges of which may be found in the volcanic islands and mountainous surface of the Azores, the Canaries and Cape Verd, is not devoid of geographical probability . . .’ ” — 1:594 fn. “The Greeks, who, moreover, never dared to pass . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘. . . the Greeks, who, moreover, never dared to pass beyond the pillars of Hercules, on account of their dread of the mysterious ocean, appeared too late in antiquity for the stories preserved by Plato to be anything else than an echo of the Indian legend. Moreover, when we cast a look on a planisphere, at the sight of the islands and islets strewn from the Malayan Archipelago to Polynesia, from the straits of Sund to Easter Island, it is impossible, upon the hypothesis of continents preceding those which we inhabit, not to place there the most important of all.’ ” — 1:594 fn. [*Histoire des Vierges*, pp. 14-15]

“A religious belief, common to Malacca and Polynesia . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘A religious belief, common to Malacca and Polynesia, that is to say to the two opposite extremes of the Oceanic world, affirms “that all these islands once formed two immense countries, inhabited by yellow men and black men, always at war; and that the

gods, wearied with their quarrels, having charged Ocean to pacify them, the latter swallowed up the two continents, and since, it had been impossible to make him give up his captives. Alone, the mountain-peaks and high plateaux escaped the flood, by the power of the gods, who perceived too late the mistake they had committed.” ’ ” — 1:594 fn. [*Histoire des Vierges*, p. 15]

“Whatever there may be in these traditions . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘Whatever there may be in these traditions, and whatever may have been the place where a civilization more ancient than that of Rome, of Greece, of Egypt, and of India was developed, it is certain that this civilization did exist, and that it is highly important to science to recover its traces, however feeble and fugitive they may be’ (pp. 13-15).” — 1:595 fn. [*Histoire des Vierges*, p. 15]

This last tradition corroborates the one given . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “This last tradition, translated by Louis Jacolliot from the Sanscrit manuscripts, corroborates the one we have given from the ‘Records of the Secret Doctrine.’ The war mentioned between the yellow and the black men, relates to a struggle between the ‘sons of God’ and the ‘sons of giants,’ or the inhabitants and magicians of the Atlantis.” — 1:595 fn.

The final conclusion . . . “As to the Polynesian continent . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “The final conclusion of M. Jacolliot, who visited personally all the islands of Polynesia, and devoted years to the study of the religion, language, and traditions of nearly all the peoples, is as follows: ‘As to the Polynesian continent which disappeared at the time of the final geological cataclysms, its existence rests on such proofs that to be logical we can doubt no longer.’ ” — 1:595 fn. [*Histoire des Vierges*, p. 307]

“The three summits of this continent . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘The three summits of this continent, Sandwich Islands, New Zealand, Easter Island, are distant from each other from fifteen to eighteen hundred leagues, and the groups of intermediate islands, Viti, Samoa, Tonga, Foutouna, Ouvea, Marquesas, Tahiti, Poupoutou, Gambiers, are themselves distant from these extreme points from seven or eight hundred to one thousand leagues.’ ” — 1:595 fn. [*Histoire des Vierges*, p. 307]

“All navigators agree in saying . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘All navigators agree in saying that the extreme and the central groups could never have communicated in view of their actual geographical position, and with the insufficient means they had at hand. It is physically impossible to cross such distances in a pirogue [canoe] . . . without a compass, and travel months without provisions.’ ” — 1:595 fn. [*Histoire des Vierges*, pp. 307-8]

“On the other hand, the aborigines of the Sandwich Islands . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘On the other hand, the aborigines of the Sandwich Islands, of Viti, of New Zealand, of the central groups, of Samoa, Tahiti, etc., *had never known each other, had never heard of each other* before the arrival of the Europeans.’ ” — 1:595 fn. “And yet each of these people maintained . . .”

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “ ‘And yet, each of these people maintained that their island had at one time formed part of an immense stretch of land which extended toward the West, on the

side of Asia. And all, brought together, were found to speak the same language, to have the same usages, the same customs, the same religious belief. p/q: G. H. Pember, *Earth’s Earliest Ages*, 1884: “. . . Satan . . . is said to have been, by God’s appointment, the Anointed Cherub . . .” “God created Satan the fairest and wisest of all His creatures in this part of His universe, and made him Prince of the World and of the Power of the Air.” — pp. 60, 64

“He was placed in an Eden . . . far anterior to the Eden of Genesis . . .”

p/q: G. H. Pember, *Earth’s Earliest Ages*, 1884: “He was placed in an Eden, or region of delight, which was both far anterior to the Eden of Genesis . . . and also, apparently, of an altogether different and more substantial character, resembling the New Jerusalem as described in the Apocalypse.” — p. 64

“Satan, being perfect in wisdom, and beauty . . .”

p/q: G. H. Pember, *Earth’s Earliest Ages*, 1884: “. . . Satan . . . being perfect in wisdom and beauty. His vast empire . . . may not improbably comprehend the whole of our solar system. Certainly no other angelic power of greater or even equal dignity has been revealed to us. The Archangel Michael himself is quoted by Jude as preserving towards the Prince of Darkness the respect due to a superior, however wicked he may be, until God has formally commanded his deposition.” — p. 58

“Satan was from the moment of his creation . . .”

p/q: G. H. Pember, *Earth’s Earliest Ages*, 1884: “The meaning [*Ezekiel*, 28:13] . . . seems to be that Satan was from the moment of his creation surrounded by the insignia of royalty; that he awoke to consciousness to find the air filled with the rejoicing music of those whom God had appointed to stand before him. In the next verse we seem to pass from the royalty of Satan to his priestly dignity.” — pp. 59-60

“Satan was also a priest of the Most High”

p/q: G. H. Pember, *Earth’s Earliest Ages*, 1884: “He was also a priest of the Most High, and his place was at the footstool of the throne of God.” — p. 60 side note

“Antichrist will be Satan incarnate”

p/q: G. H. Pember, *Earth’s Earliest Ages*, 1884: “But Antichrist will be Satan incarnate.” — p. 56 sidenote

The author notes the “avowed origin” (of Theosophy) . . .

p/q: G. H. Pember, *Earth’s Earliest Ages*, 1884: “The latter scheme, or spiritual evolution . . . is, under sundry disguises and with various modifications, insinuating itself in quarters where its rejection might have been deemed certain. . . . Should any of our readers be predisposed in favour of such a theory, we would entreat them to consider its pedigree as given in our chapter on Theosophy; to note its avowed origin from ‘descending angels,’ who can be none other than those Nephilim which the Bible mentions . . .” — p. vii (Preface)

“Visions” of Enoch relate to . . . initiation

p/q: Augustus Le Plongeon, *Sacred Mysteries Among the Mayas and the Quiches*, 1886: “Still, on reading the visions in the book of Henoch . . . one can scarcely refrain from believing that . . . the author relates his experience at the initiation, and what he learned in the mysteries before being converted to Christianity.” — p. 16

this book was written “at the beginning of the Christian era . . .”

p/q: Augustus Le Plongeon, *Sacred Mysteries Among the Mayas and the Quiches*, 1886: “That book is believed to have been written at the beginning of the Christian era, when . . . the customs and religion of the Egyptians fell into decadency . . .” — p. 16

“Satan, or Lucifer, represents . . . Fire, Light, Life, Struggle . . .”

p/q: Mirza Moorad Alee Beg [Godolphin Mitford], “The War in Heaven,” Dec. 1881: “. . . Satan represents the *Active*, or as Baissac calls it, the ‘Centrifugal’ Energy of the Universe — He is Fire, Light, Life, Struggle, Effort, Thought, Consciousness, Progress, Civilization, Liberty, Independence. At the same time he is *Pain*, which is the Reaction of the *Pleasure* of Action, and *Death*, which is the Revolution of *Life* — Satan burning in his own Hell, produced by the fury of his own momentum, — the expansive disintegration of the Nebula which is to concentrate into New Worlds. And fitly is he again and again baffled by the Eternal Inertia of the *Passive* Energy of the Kosmos — the Inexorable ‘I AM’ — the Flint from which the sparks are beaten out. And fitly as regards *our* world are he and his adherents . . . consigned to the ‘Sea of Fire’ — because *it is* the SUN, the Font of Life in *our* system, where they are purified (meaning thereby disintegrated) and churned up to re-arrange them for another life (the Resurrection) — that *Sun*, which, as the Origin of the Active Principle of our Earth, is at once *the Home* and the *Source* of the Mundane Satan.” — p. 68 (*The Theosophist*, v. 3)

Satan is immortal in his own Fire-Sea — it is only in the ‘Nifl-Heim’ of the ‘I AM’ that he cannot exist. But for all that, there is a kind of *Immortal* Existence in the Nifl-Heim, and that Existence *must be Painless and Peaceful* because it is *Unconscious* and *Inactive*. In the kingdom of JEHOVAH there is no Misery, no War, no Marrying and Giving in Marriage — No Change — NO INDIVIDUAL CONSCIOUSNESS. Soon, however, by increased

deposit taking place in their interior behind, below, and at the sides, the thalami become solid, and at the same time a cleft or fissure appears between them above, and penetrates down to the internal cavity, which continues open at the back part opposite the entrance of the Sylvian aqueduct. The present seventh Manu is called ‘Vaivasvata’ and stands in the exoteric texts for that Manu who represents in India the Babylonian Xisus-thrus and the Jewish Noah. But in the esoteric books we are told that Manu Vaivasvata, the progenitor of our *fifth* race who saved it from the flood that nearly exterminated the Fourth (Atlantis) — is not the seventh Manu, mentioned in the nomenclature of the Root — or primitive Manus, but one of the 49 Manus ‘emanated from this “root” — Manu.’ ” — p. 254 (*The Theosophist*, v. 4)

6th Round.	{ 6th (R.) M. " "	A. – Dharma Savarni.

7th Round.	{ 7th (R.) M. " "	A. – Rouchya.

Vaivasvata thus though seventh in the order given, is the primitive Root-Manu of our 4th Human Wave: — (the reader must always remember that Manu is not a man but collective humanity), while *our* Vaivasvata was but one of the seven Minor Manus who are made to preside over the seven races of this our planet. Each of these has to become the witness of one of the periodical and ever-recurring cataclysms (by fire and water in turn) that close the cycle of every Root-race. And it is this Vaivasvata, — the Hindu ideal embodiment called respectively Xisusthrus, Deukalion, Noah and by other names — who is the allegorical man who rescued our race when nearly the whole population of one hemisphere perished by water, while the other hemisphere was awakening from its temporary obscuration.” — p. 254 (*The Theosophist*, v. 4)

The Ophites adopted their rites from Hermes Trismegistus

SEE: John Bathurst Deane, “Observations on Dracontia,” Dec. 13, 1832: “Much ingenuity has been exercised by Kircher to account for the origin of this [Ophite] hierogram. He supposes that Hermes Trismegistus was the inventor of it. This person was probably high priest of the Egyptian God Thoth, or Thrice Great Hermes, and assumed his name in compliance with the common custom of the religion.” — p. 192 (*Archaeologia*, v. 25)

Iacchus again is Iao or Jehovah . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: ". . . Iacchus again is Iao or Jehovah; and Baal or Adon, like Bacchus, was a phallic god. 'Who shall ascend into the hill (the high place) of the Lord?' asks the holy king David, 'who shall stand in the place of his *Kadushu* קדשו' (*Psalms* xxiv. 3). *Kadesh* may mean in one sense to *devote*, *hallow*, *sanctify*, and even to initiate or to set apart; but it also means the ministers of lascivious rites (the Venus-worship) and the true interpretation of the word *Kadesh* is bluntly rendered in *Deuteronomy* xxiii. 17; *Hosea* iv. 14; and *Genesis* xxxviii., from verses 15 to 22." — 2:45

Iacchus . . . Iao or Jehovah

SEE: Godfrey Higgins, *Anacalypsis*, 1836: "According to Herodotus, Bacchus was called Iacchus, in the mysteries. . . . Selden and Vossius allow this to be the same as the Jah, or Ιαω of Diodorus." The plain meaning . . . is, ‘And he brought out the (goddess) *Asherah*, from the house of the Lord, and burnt it’ . . . the true meaning of the place appears farther from verse 7. where it is said, ‘He broke down the houses of the sodomites’ . . . ‘where the women wove hangings for the grove’ . . .” — 2:452 fn.

The dance performed by David round the ark . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “The dance performed by David round the ark was the ‘circle-dance’ said to have been prescribed by the Amazons for the Mysteries. Such was the dance of the daughters of Shiloh (*Judges* xxi. 21, 23 *et passim*), and the leaping of the prophets of Baal (*I Kings* xviii. 26). It was simply a characteristic of the Sabean worship, for it denoted the motion of the planets round the sun.” — 2:45

The umbilicus is connected through the placenta . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “The umbilicus is connected with the receptacle in which are fructified the germs of the race. The Ark is the sacred *Argha* of the Hindus, and thus, the relation in which it stands to Noah’s ark may be easily inferred, when we learn that the *Argha* was an oblong vessel, used by the high priests as a sacrificial chalice in the worship of Isis, Astartè, and Venus-Aphroditè, all of whom were goddesses of the generative powers of nature, or of matter — hence, representing symbolically the Ark containing the germs of all living things.” — 2:444

p/q: *The Book of Enoch*, tr. Richard Laurence, 1883: “In revising the proof-sheets of the Book of Enoch, we have been still further impressed by its relationship with New Testament Scripture. Thus, the parable of the sheep, rescued by the good Shepherd from hireling guardians and ferocious wolves, is obviously borrowed by the fourth Evangelist from Enoch lxxxix., in which the author depicts the shepherds as killing and destroying the sheep before the advent of their Lord, and thus discloses the true meaning of that hitherto mysterious passage in the Johannine parable — ‘All that ever came before me are thieves and robbers’ — language in which we now detect an obvious reference to the allegorical shepherds of Enoch.” — p. xlviiii (Introduction)

Soma is the fruit of the Tree of Knowledge . . .

SEE: Herbert Spencer, *Principles of Sociology*, 1885: “Causing mental exaltation, Soma is described in the Vedic hymns as giving knowledge. We have the expressions — ‘Soma of incomparable wisdom’ . . . ‘we have drunk the Soma . . . we have entered into light.’ By implication, then, the Soma is called, if not a ‘tree of knowledge,’ still, a plant of knowledge.” — 1:351 fn.

forbidden by the jealous Elohim . . . “lest Man should become as one of us”

SEE: Thomas Lumisden Strange, *Legends of the Old Testament*, 1874: “It was the policy of the learned, among the ancients, to exclude the common people from access to the means of knowledge. . . . The Hebrews have attributed this unworthy jealousy to the Creator . . . ‘Behold,’ he said, ‘the man is become as one of us, to know good and evil’ [*Gen.* 3:22], and in his wrath he drove him out of the garden.” — p. 184

“. . . as one of us”

SEE: Charles Bradlaugh, *Genesis: Its Authorship and Authenticity*, 1882: “‘As one of us’ . . . Geddes adds: ‘I think it is clear that the writer makes Jehovah address himself to other Gods . . . to celestial superior beings whose occasional residence was paradise; and where the fruit of the tree of knowledge of good and evil was for them reserved’ . . .” — p. 126

the various values for the computation of the value of π

SEE: J. Ralston Skinner, *The Source of Measures*, 1875: “‘A very remarkable blending of all these systems can be given, arising from the actual method used by the Hindus, for the calculations of *sines*, *tangents*, *cosines*, *cotangents*, etc., which belongs to their most ancient system of astronomical calculations. This method is given by Mr. John Bentley, in his “*Historical View of the Hindu Astronomy*” (sec. 3, page 156). He is giving the various values for the computations of the value of π . . .’ ” — p. 86

Mr. Bentley . . . “was greatly familiar with the Hindu astronomical . . .”

p/q: J. Ralston Skinner, *The Source of Measures*, 1875: “‘Mr. Bentley was greatly familiar with the Hindu astronomical and mathematical knowledge. . . . This statement of his, then, may be taken as authentic. The same remarkable trait, among so many Eastern and ancient nations, of sedulously concealing the arcana of this kind of knowledge, is a marked one among the Hindus. That which was given out to be popularly taught, and to be exposed to public inspection, was but the approximate of a more exact but hidden knowledge. And this very formulation of Mr. Bentley will strangely exemplify the assertion; and, explained, will show that it was derived from a system exact beyond the European one, in which Mr. Bentley himself, of course, trusted, as far in advance of the Hindu knowledge, at any time, in any generation.’ ” — pp. 86-7

SEE: George E. Wright, “The Real Basis of Astrology,” June 1894: “. . . *Venus* . . . *Hindu* astrology from the earliest times considered this planet as having two aspects, in one being known as *Sukra*, the bright, the shining, and in the other and lower aspect as *Usanas* . . . The name *Venus* was derived directly from *Usanas*, and *Sukra*, the shining one, became *Lucifer*, the bright, the morning-star. And then, last of all, the church took a hand and formulated a theory or, rather, a myth . . . *Lucifer* should be considered as a fallen angel, as a basis for the myth of *Satan* . . .” — pp. 77-8 (*The Path*, v. 9)

Even if it had pleased Moses to bestow the name upon the tutelary ‘Spirit,’ the alleged protector and national deity of the ‘Chosen people of Israel,’ there is yet no possible reason why other nationalities should receive Him as the Highest and One-living God. But we deny the assumption altogether.” — 2:296-7

Besides, there is the fact that the Jaho or Iao was a “Mystery name” . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “Besides, there is the fact that *Yaho* or *Iao* was a ‘mystery name’ from the beginning. יהוה and יה never came into use before King David. Anterior to his time, few or no proper names were compounded with *iah* or *jah*. It looks rather as though David, being a sojourner among the Tyrians and Philistines (2 *Samuel*), brought thence the name of *Jehovah*. He made *Zadok* high priest, from whom came the *Zadokites* or *Sadducees*. He lived and ruled first at *Hebron* הבררין, *Habir-on* or *Kabeir-town*, where the rites of the four (mystery-gods) were celebrated. “the circle and the cross are inseparable . . .”

p/q: Gerald Massey, *Natural Genesis*, 1883: “The circle and cross are inseparable. . . . The Crux Ansata unites the circle and cross of the four corners. From this origin the circle and the cross came to be interchangeable at times. For example, the Chakra, or Disk of Vishnu is a circle. The name denotes the circling, wheeling round, periodicity, the wheel of time. This the god uses as a weapon to hurl at the enemy. In like manner Thor throws his weapon, the Fylfot, a form of the four-footed cross, and a type of the four quarters. Thus the cross is equivalent to the circle of the year. The wheel emblem unites the cross and circle in one, as does the hieroglyphic cake and the Ankh-tie .

“At each of the four corners is placed a quarter arc . . .”

p/q: Gerald Massey, *Natural Genesis*, 1883: “A most curious form of the cross is given in the *Journal of the Royal Asiatic Society* {Vol. xviii. p. 393, pl. 4}. At each of the four corners is placed a quarter arc of an oviform curve, and when the four are put together they form an oval; thus the figure combines the cross with the circle round it in four parts, corresponding to the four corners of the cross. The four segments answer to the four feet of the Swastika cross and the Fylfot of Thor. The four-leaved lotus flower of Buddha is likewise figured at the centre of this cross, the lotus being an Egyptian and Hindu type of the four quarters. The four quarter arcs, if joined together, would form an ellipse, and the ellipse is also figured on each arm of the cross. This ellipse therefore denotes the path of the earth.” — 1:422 & fn.

“The top of this is the hieroglyphic Ru . . .”

p/q: Gerald Massey, *Natural Genesis*, 1883: “The top of this is the hieroglyphic Ru , set upright on the Tau-cross. The Ru is the door, gate, mouth, the place of outlet. This denotes the birth-place in the northern quarter of the heavens, from which the Sun is reborn. Hence the *Ru of the Ankh sign is the feminine type of the birthplace representing the north*. It was in the northern quarter that the goddess of the Seven Stars, called the ‘Mother of the Revolutions,’ gave birth to time in the earliest circle of the year. The first sign of this primordial circle and cycle made in heaven is the earliest shape of the Ankh-cross, , a mere loop which contains both a circle and the cross in one image. This loop or noose is carried in front of the oldest genitrix, Typhon of the great Bear, as her *Ark*, the ideograph of a period, an ending, a time, shown to mean one revolution.” — 1:423

“This then represents the circle made in the northern heaven . . .”

p/q: Gerald Massey, *Natural Genesis*, 1883: “This, then, represents the circle made in the northern heaven by the Great Bear which constituted the earliest year of time, from which fact we infer that the loop or Ru of the North represents that quarter, the birthplace of time when figured as the Ru of the Ankh symbol. Indeed this can be proved. The noose is an *Ark* or *Rek* type of reckoning. The Ru of the Ankh-cross was continued in the Cypriote R, , and the Coptic Ro, P. The Ro was carried into the Greek cross , which is formed of the Ro and Chi, or *R-k*. . . . The Rak, or Ark, was the sign of all beginning (*Arche*) on this account, and the Ark-tie is the cross of the north, the hind part of heaven.” — 1:423

The T (Tau), and the astronomical cross of Egypt . . .

p/q: H. P. Blavatsky, *Isis Unveiled*, 1877: “The T (Tau), and the astronomical cross of Egypt ⊕ are conspicuous in several apertures of the remains of Palenque. In one of the *basso-relievos* of the Palace of Palenque, on the west side, sculptured on a hieroglyphic, right under the seated figure, is a *Tau*. The standing figure, which leans over the first one, is in the act of covering its head with the left hand with the veil of initiation; while it extends its right with the index and middle finger pointing to heaven. The position is precisely that of a Christian bishop giving his blessing, or the one in which Jesus is often represented while at the Last Supper.” — 1:572

(Wordsworth on *Joshua*.) . . . The strangest expression of this

kind is in Numbers xxv. 4, where, by Onkelos (?), it is read, ‘*Crucify them before the Lord (Jehovah) against the sun.*’ The word here is *נָקַץ*, *to nail to*, rendered properly (Fuerst) by the Vulgate, *to crucify*. The very construction of this sentence is mystic.” — p. 204

Let the reader who doubts the statement consult the Hebrew originals . . .

p/q: “The Crucifixion of Man,” May 15, 1888: “Let the reader who doubts the statement consult the Hebrew originals before he denies. Let him turn to some most suggestive Egyptian *bas reliefs*. One especially from the temple of Philoe, represents a *scene of initiation*. Two Gods-Hierophants, one with the head of a hawk (the Sun), the other *ibis*-headed (Mercury, Thoth, the god of Wisdom and secret learning, the assessor of Osiris-Sun), are standing over the body of a candidate just initiated. They are in the act of pouring on his head a double stream of water (the water of life and new *birth*), which stream is interlaced in the shape of a cross and full of small ansated crosses.” — p. 250 (*Lucifer*, v. 2 [Editors’ Note])

Then appeared the Hierophants-Initiators . . .

p/q: “The Crucifixion of Man,” May 15, 1888: “Then appeared the Hierophants-Initiators and the sacramental words were pronounced, visibly, to the Sun-Osiris, addressed in reality to the Spirit Sun within, enlightening the newly-born man. Let the reader meditate on the connection of the Sun with the Cross in both its generative and spiritually regenerative capacities — from the highest antiquity. Let him examine the tomb of Beit-Oualy, in the reign of Ramses II., and find on it the crosses in every shape and position. In this extraordinary sculpture and painting one sees . . .

p/q: “The Crucifixion of Man,” May 15, 1888: “In this extraordinary sculpture and painting one sees the disc of the Sun beaming upon an ansated cross placed upon a cross of which those of the Calvary were perfect copies. The ancient papyri mention these as the ‘hard couches of those who were in (spiritual) travail, the *act of giving birth to themselves.*’ A quantity of such cruciform ‘couches’ on

which the candidate, thrown into a dead trance at the end of his supreme initiation, was placed and secured, were found in the underground halls of the Egyptian temples after their destruction. The worthy, ignorant Fathers of the Cyril and Theophilus types used them freely, believing they had been brought and concealed there by some new converts. Alone Origen, and after him Clemens Alexandrinus, and other ex-initiates, knew better. *But they preferred to keep silent.*” — p. 250 (*Lucifer*, v. 2 [Editors’ Note])

“The theoretical use of crucifixion must have been . . .”

p/q: J. Ralston Skinner, *The Source of Measures*, 1875: “The theoretical use of crucifixion, then, must have been somehow connected with the personification of this symbol. But how? And as showing what? The symbol was of the origin of measures, shadowing forth *creative law* or *design*. What, practically, as regards humanity, could actual crucifixion betoken? Yet that it was held as the effigy of some mysterious working of the same system, is shown from the very fact of the use. There seems to be deep below deep as to the mysterious workings of these number values. Not only are they shown to work in the cosmos . . . By sympathy, they seem to work out conditions relating to an unseen and spiritual world, and the prophets seem to have held knowledge of the connecting links.” — p. 204

p/q: J. Ralston Skinner, *The Source of Measures*, 1875: “Reflection becomes more involved when it is considered that the power of expression of the law, *exactly*, by numbers clearly defining a system, was not the *accident* of the language, but was its very *essence*, and of its *primary organic construction*; therefore, neither the language, nor the mathematical system attaching to it, could be of man's invention, unless both were *founded upon a prior language, which afterward became obsolete.*” — pp. 204-5

one of the seven esoteric meanings implied in this mystery . . .

p/q: “The Crucifixion of Man,” May 15, 1888: “One of the *seven esoteric meanings* implied in the mystery of Crucifixion by the mystic inventors of the system — the original elaboration and adoption of which dates back into the night of time and the establishment of the MYSTERIES — is discovered in the geometrical symbols containing the history of the evolution of man. The Hebrews, whose prophet Moses was learned in the Wisdom of Egypt, and who adopted their numerical system from the Phœnicians, and later from the Gentiles from whom they borrowed most of their Kabalistic Mysticism, adapted most ingeniously the Cosmic and anthropological symbols of the ‘heathen’ nations to their peculiar *secret* records.” — p. 247 (*Lucifer*, v. 2 [Editors’ Note])

If Christian sacerdotalism has lost the key of it to-day . . .

p/q: “The Crucifixion of Man,” May 15, 1888: “If Christian sacerdotalism has lost the key of it to-day, the early compilers of the Christian Mysteries were well versed in Esoteric philosophy, and used it dexterously. Thus they took the word *aish* (one of the Hebrew word forms for MAN) and used it in conjunction with that of *Shānāh* ‘lunar year’ so mystically connected with the name of Jehovah, the supposed ‘father’ of Jesus and embosomed the mystic idea in an astronomical value and formula.” — pp. 247-8 (*Lucifer*, v. 2 [Editors’ Note])

The original idea of “Man Crucified” in Space . . .

p/q: “The Crucifixion of Man,” May 15, 1888: “The original idea of ‘Man Crucified’ in Space belongs certainly to the ancient Hindus, and Muir [Moor] shows it in his ‘Hindu Pantheon’ in the engraving that represents Wittoba [Vithobā] — a form of Vishnu. Plato adopted it in his decussated Cross in Space, the X, ‘the Second God who impressed himself on the Universe in the form of the Cross’; Krishna is likewise shown ‘crucified.’ (See Dr. Lundy’s *Monumental Christianity*, fig. 72.)

Again it is repeated in the Old Testament in the queer injunction of *crucifying men* before the Lord, *the Sun* — which is no prophecy at all, but has a direct phallic significance.” — p. 248 (*Lucifer*, v. 2 [Editors’ Note])

“In symbol, the nails of the cross have for the shape . . .”

p/q: J. Ralston Skinner, *The Source of Measures*, 1875: “In symbol, the nails of the cross have for the shape of the heads thereof a solid pyramid, and a tapering square obeliscal shaft, or phallic emblem, for the nail. Taking the position of the *three* nails in the man’s extremities, and on the cross they form or

mark a *triangle* in shape, one nail being at each corner of the triangle. The wounds, or *stigmata*, in the extremities are necessarily *four*, designative of the *square* . . . The three nails with the three wounds are in number 6, which denotes the 6 faces of the cube *unfolded*, on which the man is placed; and this in turn points to the circular measure transferred onto the edges of the cube. The *one* wound of the feet separates into *two* when the feet are separated, making *three* together for all, and *four* when separated, or 7 in all — another and *most holy feminine* base number.” — p. 52

Thus, while the phallic or sexual meaning of the “Crucifixion Nails” is proven . . .

p/q: “The Crucifixion of Man,” May 15, 1888: “Thus, while the phallic or sexual meaning of the ‘Crucifixion Nails’ is proven by the geometrical and numerical reading, its mystical meaning is indicated by the short remarks upon it, as given above in its connection with, and bearing upon, Prometheus. He is another victim, for he is crucified on the Cross of Love, on the rock of human passions, a sacrifice to his devotion to the cause of the spiritual element in Humanity.” — p. 248 (*Lucifer*, v. 2 [Editors’ Note])

The Cross, not the Crucified, is the essential object of representation in its art, and of adoration in its religion. The

germ of the whole growth and development can be traced to the cross. And that cross is pre-Christian, is pagan and heathen, in half a dozen different shapes. The Cult began with the cross, and Julian was right in saying he waged a 'Warfare with the X;' which he obviously considered had been adopted by the A-Gnostics and Mytholators to convey an impossible significance. The Tetrad . . . “is the *animal itself* of Plato . . .”

p/q: George Oliver, *The Pythagorean Triangle*, 1875: “The tetrad, as Mr Taylor thinks, is, however, the *animal itself* of Plato, who, as Syrianus justly observes, was the best of the Pythagoreans; [the tetrad] subsists at the extremity of the intelligible triad, as is most satisfactorily shown by Proclus in the third book of his treatise on the theology of Plato. And between these two triads, the one intelligible, and the other intellectual, another order of gods exists, which partakes of both extremes.” — p. 104

“The Pythagorean world . . . consisted of a double quaternary.” . . .

p/q: George Oliver, *The Pythagorean Triangle*, 1875: “The Pythagorean world, according to Plutarch {*De anim. procr.*, 1027}, consisted of a double quaternary. The quaternary of the intellectual world is T’Agathon, Nous, Psyche, Hyle; while that of the sensible world, which is properly what Pythagoras meant by the word Kosmos, is Fire, Air, Water, and Earth. The four elements are called by the name of *rizomata*, the roots or principles of all mixed bodies.” — p. 112 & fn.

“Thus number *four* forms the arithmetical mean . . .”

p/q: George Oliver, *The Pythagorean Triangle*, 1875: “This number forms the arithmetical mean between the monad and the heptad; and this comprehends all powers, both of the productive and produced numbers; for this, of all numbers under ten, is made of a certain number; the duad doubled makes a tetrad, and the tetrad doubled makes the hebdomad.” — p. 104

p/q: George Oliver, *The Pythagorean Triangle*, 1875: “The name of Harmony was given to the tetrad, because it is a diatessaron [a fourth] in sesquitertia [4:3 ratio]. The Pythagoreans, however, were of opinion, according to Theon in his ‘*Mathematica*,’ that the division of the canon of the monochord was made by the tetractys in the duad, triad, and tetrad; for it comprehends a sesquitertia, a sesquialtera [3:2], a duple, a triple, and a quadruple proportion, the section of which is 27. In the ancient musical notation, the tetrachord consisted of three degrees or intervals, and four terms or sounds, called by the Greeks diatessaron and by us a fourth.” — p. 114

“The real esoteric seven-fold classification . . .”

p/q: T. Subba Row, “The Constitution of the Microcosm,” Aug. 1887: “The real esoteric seven-fold classification is one of the most important, if not the most important classification, which has received its arrangement from the mysterious constitution of this eternal type. I may also mention in this connection that the four-fold classification claims the same origin. The light of life, as it were, seems to be refracted by the treble-faced prism of Prakriti, having the three Gunams for its three faces, and divided into seven rays, which develop in course of time the seven principles of this classification.” — p. 705 (*The Theosophist*, v. 8)

It is not the peculiar property of ‘the trans-Himalayan esoteric doctrine.’ In fact, it has a closer connection with the Brahminical Logos than with the Buddhist Logos. In order to make my meaning clear I may point out here that the Logos has seven forms. In other words, there are seven kinds of Logoi in the cosmos. Each of these has become the central figure of one of the seven main branches of the ancient Wisdom-religion.” — p. 706 (*The Theosophist*, v. 8)

“This classification is not the seven-fold classification . . .”

p/q: T. Subba Row, “The Constitution of the Microcosm,” Aug. 1887: “This classification is not the seven-fold classification we have adopted. I make this assertion without the slightest fear of contradiction. The real classification has all the requisites of a scientific classification. It has seven distinct principles, which correspond with seven distinct states of Pragna or consciousness. It bridges

the gulf between the objective and subjective, and indicates the mysterious circuit through which ideation passes. The seven principles are allied to seven states of matter, and to seven forms of force.

p/q: “Physiological Selection,” Oct. 1886: “Mr. G. J. Romanes finds certain difficulties in regarding natural selection as a theory for the origin of species, as it is rather a theory of the origin of adaptive structures. He proposes to replace it by what he calls physiological selection, or the segregation of the fit. His view is based on the extreme sensitiveness of the reproductive system to small changes in the conditions of life, and he thinks that variations in the direction of greater or less sterility must frequently occur in wild species.” — p. 769 (*Journal of the Royal Microscopical Society*, v. 6)

p/q: “Physiological Selection,” Oct. 1886: “If the variation be such that the reproductive system, while showing some degree of sterility with the parent form, continues to be fertile within the limits of the varietal form, the variation would neither be swamped by intercrossing, nor die out on account of sterility. When a variation of this kind occurs, the physiological barrier must divide the species into two parts. “In fact . . . in the theory of Darwin, transmutations do not take place . . .”

p/q: A. de Quatrefages, *The Human Species*, 1879: “In fact, in the theory of Darwin, transmutations do not take place, either by chance or in every direction. They are ruled by certain laws which are due to the organisation itself. If an organism is once modified in a given direction, it can undergo secondary or tertiary transmutations, but will still preserve the impress of the original. It is the law of *permanent characterisation* which *alone* permits Darwin to explain the filiation of groups, their characteristics and their numerous relations. It is by virtue of this law that *all* the descendants of the first mollusc have been molluscs; *all* the descendants of the first vertebrate have been vertebrates. It is clear that this constitutes one of the foundations of the doctrine. It follows that two beings belonging to two distinct types can be referred to a *common ancestor*, whose characters were not clearly developed, but the one cannot be the descendant of the other.” — pp. 106-7

This is the more difficult to believe, as the ape family which man so closely resembles in physical structure, contains numerous branches which graduate into one another, but the extremes of which differ more widely than man does from the highest of the ape series. If a special creation is required for man, must there not have been special creations for the chimpanzee, the gorilla, the orang, and for at least 100 different species of apes and monkeys which are all built on the same lines?” — p. 182

Was there, as some have believed, an Atlantis? — a continent, or an archipelago of large islands, occupying the North Atlantic. There is perhaps nothing unphilosophical in this hypothesis; for since, as geologists state, ‘the Alps have acquired 4000, and even in some places more than 10,000 feet of their present altitude since the commencement of the Eocene period’ (Lyell’s *Principles*, 11th ed. p. 256, 1872), a Post-Miocene despression might have carried the hypothetical Atlantis into almost abyssmal depths.” — pp. 194-5 (*Transactions of the Plymouth Institution*, v. 9)

We find the Tertiary element of the Old World to be intensified towards its extreme eastern margin. . . . This accession of the Tertiary element is rather gradual and not abruptly assumed in the Japan islands only. Although it there attains a maximum, we may trace it from the Mediterranean, Levant, Caucasus, and Persia . . . then along the Himalaya and through China.’” — p. 195 (*Transactions of the Plymouth Institution*, v. 9)

We note further that the present Atlantic Islands Flora affords no substantial evidence of a former direct communication with the main land of the New World. . . . The consideration of these facts leads me to the opinion that botanical evidence does not favour the hypothesis of an Atlantis. On the other hand, it strongly favours the view that at some period of the Tertiary epoch North-eastern Asia was united to North-western America, perhaps by the line where the Aleutian chain of islands now extends.’”

p/q: Nicolas Joly, *Man Before Metals*, 1883: “In making soundings in the slimy soil of the Nile valley, two baked bricks were discovered, one at a depth of twenty, the other of twenty-four yards. If we estimate the thickness of the annual deposit formed by the river at eight inches a century, we must assign to the first of these bricks an age of 12,000 years, and to the second that of 14,000. By means of analogous calculations, Burmeister supposes seventy-two thousand years to have elapsed since the first appearance of man upon the soil of Egypt, and Draper attributes to the European man who witnessed the last glacial epoch an antiquity of more than 250,000 years.” — p. 183 fn.

“When the level of the Baltic and of the North Sea . . .”

p/q: Nicolas Joly, “Professor at the Science Faculty of Toulouse,” *Man Before Metals*, 1883: “The level of the Baltic and of the North Sea was 400 feet higher than it is at the present day. The valley of the Somme was not hollowed to the depth it has now attained; Sicily was joined to Africa, Barbary to Spain. Carthage, the pyramids of Egypt, the palaces of Uxmal and Palenque were not yet in existence, and the bold navigators of Tyre and of Sidon who at a later date were to undertake their perilous voyages along the coasts of Africa, were yet unborn. What we know with certainty is that European man was contemporaneous with the extinct species of the quaternary epoch . . . that he witnessed the upheaval of the Alps and the extension of the glaciers, in a word, that he lived for thousands of years before the dawn of the remotest historical traditions.” — p. 184 (“The Antiquity of the Human Race”)

At all events, if it can be shown that land existed in former ages where the North Atlantic now rolls, not only is a motive found for these apparently suicidal migrations, but also a strong collateral proof that what we call instincts are but the blind and sometimes even prejudicial inheritance of previously acquired experience.” — p. 152 (*Popular Science Review*, v. 16)

Nothing is urged that renders these more direct connexions impossible, and no physical reason is advanced why the floor of the Ocean should not be upheaved from any depth. The route by which the floras of South America and Australia are supposed to have mingled is beset by almost insurmountable obstacles, and the apparently sudden arrival of a number of sub-tropical American plants in our Eocenes, necessitates a connexion more to the south than the present 1000-fathom line.” — pp. 241-2 (*Geological Magazine*, v. 8)

Professor Oliver, on the other hand, after showing how many of the American types found fossil in Europe are common to Japan, inclines to the theory, first advanced by Dr. Asa Gray, that the migration of species, to which the community of types in the Eastern States of North America and the Miocene flora of Europe is due, took place when there was an overland communication from America to Eastern Asia between the fiftieth and sixtieth parallels of latitude, or south of Behring’s Straits, following the direction of the Aleutian Islands. We learn from Plutarch, that this was the theme of one of the hymns of Orpheus, so celebrated in the fabulous ages of Greece. It was brought by him from the banks of the Nile; and we even find in his verses, as in the Indian systems, a definite period assigned for the duration of each successive world. The returns of great catastrophes were determined by the period of the Annus Magnus, or great year — a cycle composed of the revolutions of the sun, moon, and planets, and terminating when these return together to the same sign whence they were supposed at some remote epoch to have set out.” — 1:12

Among savages, as in the traditions of the richest literature in the world — the Sanskrit literature of

India — there is an agreement in saying that, ages ago, there existed in the Pacific Ocean, a large continent which, by a geological upheaval, was engulfed by the sea. And it is our firm belief . . . that most, if not all of the islands from the Malayan Archipelago to Polynesia, are fragments of that once immense submerged continent. Both Malacca and Polynesia, which lie at the two extremities of the Ocean, and which, since the memory of man never had nor could have any intercourse with, or even a knowledge of each other, have yet a tradition, common to all the islands and islets, that their respective countries extended far, far out into the sea; that there were in the world but two immense continents, one inhabited by yellow, the other by dark men; and that the ocean, by command of the gods and to punish them for their incessant quarrelling, swallowed them up.” — p. 279 (*The Theosophist*, v. 1)

And all these things recent investigation has proved conclusively. Deep-sea soundings have been made . . . the United States ship *Dolphin* . . . and *Challenger* have mapped out the bottom of the Atlantic, and the result is the revelation of a great elevation, reaching from a point on the coast of the British Islands southwardly to the coast of South America, at Cape Orange, thence south-eastwardly to the coast of Africa, and thence southwardly to Tristan d’Acunha.” — pp. 46, 49

"We are but beginning to understand the past . . ."

p/q: Ignatius Donnelly, *Atlantis: The Antediluvian World*, 1882: "We are but beginning to understand the past: one hundred years ago the world knew nothing of Pompeii or Herculaneum; nothing of the lingual tie that binds together the Indo-European nations; nothing of the significance of the vast volume of inscriptions upon the tombs and temples of Egypt; nothing of the meaning of the arrow-headed inscriptions of Babylon; nothing of the marvellous civilizations revealed in the remains of Yucatan, Mexico, and Peru. We are on the threshold. Scientific investigation is advancing with giant strides. Who shall say that one hundred years from now the great museums of the world may not be adorned with gems, statues, arms, and implements from Atlantis, while the libraries of the world shall contain translations of its inscriptions, throwing new light upon all the past history of the human race, and all the great problems which now perplex the thinkers of our day?" — p. 480
